

**PS ZP300-P**

# Automatic Barrier Film Bagger

The ZP300-P utilizes barrier film tubing to economically create barrier film bags that keeps your products inside the bag fresh and protected. It can fill and seal your bags either semi-automatically by hand filling with a foot peddle; or automatically with an integrated filling system.

Plain or pre-printed barrier film tubing is available including polyester, metalized polyester, foil, nylon, and polypropylene

**Simple to operate    Quick Change-Over    Economical**
