# POWERED Flexible Expandable Conveyor

The NESTAFLEX 1.6 POWER ELITE all roller power conveyor has a capacity of 100 pounds per lineal foot (level surface). It operates on DC drive motors with a 120VAC converter, delivering variable speeds of 0-120 feet per minute PLUS standard reversible action.

The POWER ELITE with its innovative design, requires less storage space when fully retracted, and with its ALL-BOLTED construction and durable design, this conveyor is the smart solution for distribution centers where there is high volume cross docking, loading and unloading applications.

Features such as built in impact conveyor, electronic indexing, zero pressure accumulation, and power assist, the POWER ELITE is the next step in automating your application.

The 1.6 is also a smart solution in packaging and manufacturing applications allowing greater product control and maximizing worker efficiency.

Like all NESTAFLEX conveyors the 1.6 POWER ELITE is portable, expandable and be configured to meet specific material handling needs.

Zinc-plated, heavy-duty leg supports are made from 1 1/8" square steel tubing and feature a welded cross member.

Standard heavy-duty 5" x 1 1/2" swivel casters with steel foot brake on both ends.

*"Perfect for truck loading and unloading"*

*"Checkweighers, , Fillers, Baggers, , Custom Conveyor, Scanning, Labeling, and Traceability "*
