Features

The Advanced technology process control system of the SV320S offers a multi-functional programmable system to with various alarm systems to reduce waste and down time. The SV320S features a large color touch screen with anti-glare panel. An automatic film rectifying alignment system is on board with a quick adjustment control on the vertical sealing bar. The film draw down system is controlled with dual servo motors and the horizontal sealing system is also servo motor controlled. A quick release forming tube mount means easy removal for fast change-overs. The consistent control sealing system of the SV320 S is perfect for laminate films. The SV320S features rugged stainless steel construction with hard anodized aluminum components and an aluminum top plate. No paint.
