Features

The Advanced technology process control system of the LV730 offers a multi-functional programmable system to with various alarm systems to reduce waste and down time. The LV730 features a large **color** touch screen with anti-glare panel. An automatic film rectifying alignment system is on board with quick adjustment control on the vertical sealing bar. The film draw down system is controlled with dual servo motors and the horizontal sealing system is also servo motor controlled. A quick release forming tube mount means easy removal for fast change-overs. The consistent control sealing system of the LV730 is perfect for laminate films. The LV730 features rugged stainless steel construction with hard anodized aluminum components and an aluminum top plate. No paint.
