

# Produce Market

**Problem:** Are you being charged for product that is not accurate due to improper fill or weight? Are you having entire loads rejected? Are you losing money giving away too much product to avoid an underweight situation?

**Solution:** An **IPS** in-motion checkweigher will solve these problems, eliminate underweights and provide 100% product inspection, while increasing your throughput, automatically eliminating any non-conforming products from the line.

**Results:** 100% product inspection with streaming data reports. Automatic tolerance product. Reduced charge backs

+/- 1 gram to .02 lb. 60 bags per minute reject systems for removing out of and less give -a-way with no rejected

**Bagged Products  
Clamshells**
